

**axis**

**dwarf planet**

**geocentric**

**heliocentric**

**moon**

**orbit**

**rotate**

**satellite**

**solar system**

**The belief that the other planets and the sun orbit the Earth.**

**A celestial body resembling a small planet but lacking certain technical criteria that are required for it to be classed as such.**

**An imaginary line that an object rotates around, like an imaginary pole.**

**To move in a regular, curved path around another planet.**

**A natural satellite that orbits a planet.**

**The belief that planets, including the Earth, orbit the sun – the structure of our solar system.**

**The collection of planets and moons round the sun, together with smaller bodies in the form of asteroids, meteoroids, and comets.**

**An object in space that orbits something else e.g. the Moon is a satellite of Earth. There are also manmade satellites in space.**

**To spin on an axis.**

**sphere**

**star**

**sun**
