Europe

The Alps

SDNP, Sussex, England

Key Facts

Mountains are formed when tectonic plates under the Earth's surface push together and cause the land to rise up.

There are seven continents that make up the world. North America, South America, Africa, Europe, Asia, Oceania and Antarctica .

The South Downs National Park (SDNP) is in the county of Sussex in the south of England. Bury School is located in the SDNP.

The Alps are the highest and most extensive mountain range system that lie in south-central Europe. The mountain range stretches approximately 750 miles across 6 countries - France, Switzerland, Liechtenstein, Germany, Austria and Slovenia.

The Alps is home to Mont Blanc, which at 4,810m, is the tallest mountain in western Europe.

The population density of the South-East of England is 440 people per square kilometre and in the South Downs National Park it is 67.

The population density of the Alps is approximately 60 people per square kilometre.
